

COATING SYSTEMS, INC.

10/8/2025

STATEMENT OF RoHS COMPLIANCE

Coating Systems, Inc. certifies compliance with the European Directive (EU) **2002/95/EC**, including amendments **2005/618/EC**, **2011/65/EU**, and **2015/863**, titled “*Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS)*”, for the following processes:

- Clear Trivalent Chromate Conversion on Zinc Plating (ASTM B633)
- Bright Copper Plating (MIL-C-14550)
- Bright Nickel Plating (QQ-N-290)
- Bright Tin Plating (MIL-T-10727)
- Electroless Nickel (MIL-C-26074)
- Anodizing (Conventional) (MIL-A-8625 Type II, Class 1 & 2)
- Hard Coat Anodizing (MIL-A-8625 Type III, Class 1 & 2)
- Non-Chromate Chemical Conversion Coating on Aluminum (MIL-DTL-5541) (MacDermid NCP)
- Nitric Acid Passivation of Stainless Steel
- Gold Plating (MIL-G-45204)
- Silver Plating (QQ-S-365)
- Yellow Trivalent Chromate Conversion on Zinc Plating
- Zinc Nickel Alloy Plating (AMS 2417)

These processes include all post-treatment seals and dyes.

The majority of **powder coatings and paints** used by Coating Systems Group are also **RoHS compliant**. Customers are encouraged to inquire about specific powders or paints to verify compliance.

The following processes are **not currently RoHS compliant**:

- Black Chromate Conversion on Zinc Plating
- Chromate Conversion on Aluminum

Coating Systems Group is actively investigating suitable **RoHS-compliant alternatives** for these remaining non-compliant processes. Our goal is to achieve **full compliance with RoHS specifications** across all aspects of metal finishing in the near future.

Thank you,
